Title- Alex Rider Nightshade Revenge

Author-Anthony Horowitz

Background/ The setting

This story is set in modern time and is a fictional story in the series of Alex Rider. This is the most recent book in the series. The main character's home is in England but when he embarks on his missions he often goes abroad on his journeys. I recommend if you want to read this book then make sure you read the whole series before as it is very entertaining and some parts of the story may not make sense to you.

Summary- (The plot, characters etc)

The main character is a teenager who still goes to school but he works for the government in the MI6. This is a continuation from the previous book Nightshade when Alex Rider foiled their plans to wipe out the whole UK government. This costed Nightshade a lot of funding and in this book they set out to get their revenge. There are many plot twists in this book and he even participates in a VR game that can kill you in real life.

Audience recommendation

I recommend this book for people who enjoy action and adventure books. There is moderate violence so I would recommend this for ages 11+.
